

## ROADMAP OF SDGs

In line with the guidelines published by the World Business Council for Sustainable Development (WBCSD), in 2019 ASTM defined a roadmap to improve the Group’s contribution to achieving the United Nations’ Sustainable Development Goals (SDGs) by 2030.

In particular, through an assessment of consistency, validity and application of the Sustainable Development Goals (SDGs) to the sustainability issues and policies of the Group, also taking into account the context and reference sector and the main impacts generated and experienced along the value chain, actions were identified to improve the performance and impact in relation to the SDGs.

The analysis made it possible to prioritise the SDGs based on the greater and lesser ability of the Group to contribute to achieving them through the impact generated along the value chain. A summary of the achieved results is shown below: the SDGs at the top are of greatest significance for ASTM in terms of contribution/impact. The lines shown in the chart show the existing connection between the development issues identified and represented by the SDGs. The analysis made it possible to identify targets of particular relevance and indicators used to improve the monitoring of the Group’s contribution to the targets. These indicators are monitored periodically and reported on annually in this document.

Of particular relevance were SDG 9 - Industry, innovation and infrastructure - given that ASTM is committed to developing quality, reliable, sustainable and resilient infrastructure - and SDG 11 - Sustainable cities and communities - which reflects the commitment to providing access to safe and sustainable transport systems and improving road safety.
