

THE ASTM GROUP INCLUDED IN CDP'S PRESTIGIOUS "A LIST"

- *Confirmed as a leader in the fight against climate change by major independent rating agencies*
- *Recognized for its commitment to environmental management and transparency on a global scale*
- *The Group's Climate Transition Plan, integrated into the Business Plan, proved decisive*

Tortona, 11th December 2025 – **ASTM** has reaffirmed its position as a global leader in climate-related management and transparency, earning a place in CDP's prestigious "**A List**" (formerly the Carbon Disclosure Project), the highest recognition awarded by the leading international non-profit organization for measuring and reporting environmental impacts on climate, water, and forests.

ASTM is therefore confirmed in the "**Leadership**" tier for its global environmental performance in the 2025 **climate disclosure**, improving its score compared to 2024 (A-). CDP's assessment was conducted on thousands of companies using a rigorous methodology that assigns scores from A to D- and evaluates four key dimensions: completeness of reporting, awareness of environmental risks, risk management, and adoption of environmental leadership practices.

A decisive factor in achieving this result was ASTM's **Climate Transition Plan**. Developed in line with CDP guidelines and the requirements of the Corporate Sustainability Reporting Directive (CSRD), the Plan is fully integrated into the Group's Business Plan, concretely guiding decisions and investments. Based on scenario analyses and a structured portfolio of decarbonization initiatives, the Plan outlines a long-term emissions reduction pathway, with **ambitious medium-term targets and Net Zero by 2050** for direct, indirect, and value-chain emissions.

Adding to this achievement is the upgrade of ASTM's Long Term Expected Rating to **EEE- (Excellent)** and the confirmation of its **EE+ (Very Strong)** rating, recently assigned by **Standard Ethics**, an independent rating agency, in recognition of the Group's commitment to ESG issues and the dissemination of UN-, OECD- and EU-based sustainability principles to its subsidiaries in Brazil and the United States. Moreover, in November 2025, **MSCI**—a leading global rating agency assessing companies' resilience to financially material and sector-specific ESG risks and opportunities—maintained ASTM in the A band (*Average*). Finally, **Sustainalytics**, a global sustainability research and rating agency, assigned ASTM an ESG Risk Rating of 7.5 (*Negligible*), assessing as negligible the economic value potentially at risk due to ESG factors not managed by the company.

These recognitions reward the Group's commitment to pursuing global business objectives by combining growth, innovation and responsibility, creating shared value for all Stakeholders.

ASTM Group is among the leading global infrastructure players in the management of motorway concession networks, EPC design and construction projects and technology for infrastructures. Operating in more than 15 countries, with about 14,000 employees, the Group adopts a "one-company" business model incorporating integrated skills that cover the entire value chain of the infrastructure sector. ASTM Group is the second largest operator in the world in the management of motorway infrastructure with a network of approximately 5,900 km, with more than 1,100 km of this in Italy, 4,800 km in Brazil – through the company EcoRodovias.
